## 22 May 2008 - Apache Harmony 5.0M6 Now Available

The Apache Harmony team are pleased to announce the immediate availability of Apache Harmony 5.0M6.

Apache Harmony is the Java platform project of the Apache Software Foundation.

This is the latest stable build of the Harmony project's implementation of the Java SE specification, and contains numerous enhancements and bug fixes including:

- new JIT optimizations
- functional and coverage enhancements throughout the class libraries
- improved VM threading design
- support for full hardware addressability on 64 bit platforms
- ...and much more

Source code and binary builds are available from the Harmony download site:

<http://harmony.apache.org/download.cgi>

Apache Harmony welcomes your help. For more information on how to report problems, successes, and to get involved in Apache Harmony visit the project website at <http://harmony.apache.org>
