11 January 2008 - Apache Lenya 2.0 Released

[The Apache Lenya development community](#) is very proud to announce the 2.0 release of Apache Lenya.

Apache Lenya is an Open Source Java/XML Content Management System and comes with revision control, site management, scheduling, search, WYSIWYG editors, and workflow.

Apache Lenya is based on Apache Cocoon (<http://cocoon.apache.org>). You can use Cocoon features such as robust caching, multi-channel output, its many connectivity options to quickly build customized solutions to meet your specific needs that are not already covered by Apache Lenya today.

Check out the Apache Lenya website (<http://lenya.apache.org>) for more information.

The Apache Lenya Community

New Features in Apache Lenya 2.0

=====

Architecture

- Modularization
- Separation of API and implementation

Storage and Content Model

- Documents are referenced using UUIDs
- Improved management of internal links
- Configurable meta data element sets
- New protocols simplify repository access

Website Management

- Publication templating for re-using common functionality in multiple publications
- Create new publication instances via the GUI
- Support for configurable publication properties

Access Control

- Explicitly deny permissions on particular pages

Assets and Images

- Assets and images are treated as documents
- Image upload in source editor
- SVG-based server-side image resizing

Workflow and Versioning

- Quickly manipulate multiple documents
- Personal user inboxes
- Function to override other users' check-out

Miscellaneous Features

- Various usability improvements
- News / weblog module with RSS generation
- Language selection widget
- Dynamically generated layout images, e.g. round corners
- Better and more flexible editor integration (work in progress)

Development

- Usecase framework to simplify the implementation of user interaction functionality
- Improved repository API
- Cleanup of the code base

28 February 2007 - Apache Lenya 1.2.5 released

[The Apache Lenya development community](#) is very proud to announce the 1.2.5 release of Apache Lenya. The 1.2.5 release contains all bug fixes that have accumulated since the release of 1.2.4. For a detailed list of changes, visit <http://lenya.apache.org/changes.html>

Apache Lenya is an Open Source Java/XML Content Management System and comes with revision control, site management, scheduling, search, WYSIWYG editors, and workflow.

Apache Lenya 1.2.5 is based on [Apache Cocoon](#). You can use Cocoon features such as robust Caching, multi-channel output, it's many connectivity options to quickly build customized solutions to meet your specific needs that are not already covered by Apache Lenya today.

Check out the Apache Lenya website <http://lenya.apache.org> for more information.

01 March 2005 - Apache Lenya 1.2.2 Released

Apache Lenya 1.2.2 released (maintenance release)

=====

The Apache Lenya [1] development community is very proud to announce the 1.2.2 release of Apache Lenya. Apache Lenya is an Open-Source Content Management System written in Java and based on open standards such as XML and XSLT. Lenya is built on top of Apache Cocoon [2] and other components from the Apache Software Stack. Its XML-centric architecture allows for content delivery targeted to the capabilities of various devices, and avoids data lock-in. Apache Lenya is built around Off the Shelf components from the Apache Software Foundation. Apache Lenya comes with the features you can expect of a modern Content Management System, such as Revision Control, Scheduling, a built-in Search Engine, separate Staging Areas, and Workflow. Apache Lenya 1.2.2 is based on Cocoon 2.1.6. You can use Cocoon features such as robust Caching, multi-channel output, it's many connectivity options to quickly build customized solutions to meet your specific needs that are not already covered by Apache Lenya today. Check out the Apache Lenya website <http://lenya.apache.org> for more information. -- The Apache Lenya Community Changes in 1.2.2 ----- The full changelog is available at the Apache Lenya website (<http://lenya.apache.org/changes.html>). Some highlights are: * Moved to Kupu 1.2 and BXE 1.1 * Moved to Cocoon 2.1.6 * Rewrote menu javascript code to avoid browser crashes on Linux * Improved Link rewriting * Made images and asset titles visible in the forms editor * set the date of publication, the publisher and the date of modification when a document is published * Added caching options to default publication * Enabled roundtripping of images between BXE and Kupu * Added dutch translation for Lenya UI * Added japanese translation for Lenya UI * Fixed code that tried to delete a file that was still referenced in an...

31 December 2004 - Apache Lenya 1.2.1 released (maintenance release)

[The Apache Lenya development community](#) is very proud to announce the 1.2.1 release of Apache Lenya.

Apache Lenya is an Open-Source Content Management System written in Java and based on open standards such as XML and XSLT. Lenya is built on top of [Apache Cocoon](#) and other components from the Apache Software Stack. Its XML-centric

architecture allows for content delivery targeted to the capabilities of various devices, and avoids data lock-in. Apache Lenya is built around Off the Shelf components from [the Apache Software Foundation](#).

Apache Lenya comes with the features you can expect of a modern Content Management System, such as Revision Control, Scheduling, a built-in Search Engine, separate Staging Areas, and Workflow.

Apache Lenya 1.2.1 is based on Cocoon 2.1.5.1, but Lenya 1.2.1 is also known to work with Cocoon 2.1.6. You can use Cocoon features such as robust Caching, multi-channel output, it's many connectivity options to quickly build customized solutions to meet your specific needs that are not already covered by Apache Lenya today.

Check out the Apache Lenya website <http://lenya.apache.org> for more information.

25 November 2004 - Apache Lenya Now "Top-Level" Apache Project

[Apache Lenya project](#) has evolved to become a "top-level" Apache project.

Apache Lenya is an Open-Source Content Management System written in Java and based on open standards such as XML and XSLT. Lenya is built on top of [Apache Cocoon](#) and other components from the Apache Software Stack. Its XML-centric architecture allows for content delivery targeted to the capabilities of various devices, and avoids data lock-in. Apache Lenya is built around Off the Shelf components from [the Apache Software Foundation](#).
