16 March 2004 - CeBIT 2004, Hannover, 20-21 March, Apache Software Foundation present.....	31
01 March 2004 - The ASF established two new PMCs - Portals and Gump.....	32
24 February 2004 - Geir Magnusson Jr Succeeds Sam Ruby As Jakarta Project Chair....	32

Apache Buildr -- New Apache Software Foundation Top Level Project

[The Apache Software Foundation](#) established a new Top Level Project, named Apache Buildr. Apache Buildr's mission is to create simple and intuitive build system for Java applications. For more information about Apache Buildr, see the website -- <http://buildr.apache.org/>

Note:

24 July 2007 - Apache ODE (Orchestration Director Engine) Moves Up to Top Level

[Apache ODE \(Orchestration Director Engine\)](#) executes business processes written

following the WS-BPEL standard. It talks to web services, sending and receiving messages, handling data manipulation and error recovery as described by your process definition. It supports both long and short living process executions to orchestrate all the services that are part of your application.

Apache ODE is currently moving from the [Apache Incubator](#) up to Top Level (as Top Level Project). New website can be found at <http://ode.apache.org/>

12 July 2007 - [PRESS RELEASE] OS Summit Asia 2007 - New Event by Apache and Eclipse

[OS SUMMIT ASIA 2007](#): NEW EVENT, BACKED BY APACHE AND ECLIPSE, TO DRIVE PACE OF OPEN SOURCE ADOPTION IN ASIA

Hong Kong to host Asia's largest Open Source community conference in November this year. The event is expected to be hugely popular due to rapidly growing support for Open Source software in Asia over recent years.

Hong Kong - June 29, 2007 - Two of the leading organizations in the Open Source community, [The Apache Software Foundation](#) and [the Eclipse Foundation](#), have announced plans for Asia's largest Open Source community conference - the first of its kind in Hong Kong and China.

The inaugural OS Summit Asia will be held at the Le Meridian hotel in Hong Kong's leading edge Cyberport IT development zone on November 26th - 30th 2007.

With Open Source software rapidly growing in popularity in the region, this community summit, the first joint conference between Apache and Eclipse and the first in Hong Kong and China, is expected to be a vibrant event, encouraging a lively exchange of ideas between all those involved in OSS, including developers, vendors and users.

Winston Damarillo, Co-Executive Producer of the OS Summit said, "As Asia moves to become the largest consumer of Open Source technologies, it is increasingly important that the region is able to experience the Open Source community process in action. We are excited to be able to demonstrate this in the context of the collaboration between Eclipse and Apache. Local communities and associations

have been a tremendous help in supporting us and providing the best possible venue to launch this initiative."

According to recent research from Evans Data Corporation (www.evansdata.com), the number of developers using Open Source software in Asia has jumped by 40% over the past three years. The popularity of the Linux operating system has also boomed in recent years, providing the region's developing countries with a free and robust alternative to leading commercial operating systems.

Justin Erenkrantz, President of The Apache Software Foundation, said, "The Apache Software Foundation is delighted to be supporting Open Source communities in emerging countries with the OS Summit Asia 2007 conference. We hope that by showcasing the combined communities behind Eclipse and Apache that we will be able to cultivate a stronger presence for Open Source in the region."

OS Summit Asia will offer unique educational opportunities, with hands-on training, competitively selected general sessions, and a small number of invited speakers that address new technologies, development methods, business and marketing, and licensing issues in Open Source software. Topics featured at the summit include:

ASF-wide projects such as Apache HTTP Server, Jakarta, Tomcat, Axis, Harmony, Maven, Web Services, and SpamAssassin Eclipse-wide projects such as BI and Reporting Tools (BIRT), Web Tools Platform (WTP), Eclipse Modeling Framework (EMF), Data Tools Platform (DTP), Equinox and the Rich Client Platform (RCP) Programming languages such as Java, Perl, Python, Ruby and PHP Web development technologies and techniques including security, performance tuning, e-commerce and Java EE New technologies and trends such as Web Services and Web 2.0 Open Source projects and activities in Asia, local efforts and case studies

Mike Milinkovich, Executive Director of the Eclipse Foundation said, "This event is not just about technology: it's about the community and culture and inevitability of Open Source - a movement that creates and maintains a wealth of innovation and ideas. Across Asia interest in Open Source is building. The timing of this event is perfect to harness and build on that interest."

CALL FOR PAPERS DEADLINE: 13th July 2007

Members of the Apache and Eclipse Open Source communities are invited to submit session proposals no later than 13th July 2007. All speakers and trainers will be provided with up to 7 nights in the Le Meridian Hotel at Cyberport. To create an experience of an open source community in action we are providing speakers and trainers with the opportunity of staying for the entire week of conference. And the

flight allowance for those coming in from a distance is 1300 USD.

Delegate registrations for the conference will open by the end of July.

For more information about the conference please visit the conference web site at <http://www.ossummit.com>.

If you would like more information about this press release, please contact:

Hazel Butters or James Gerber at Prompt Communications

Apache Conference -- Posted by [Tetsuya Kitahata](#) at 2007-07-12T20:04:39

21 June 2007 - Apache OpenJPA Graduates from Incubation to Become Top Level Project

[The Apache OpenJPA Project Team](#) is pleased to announce that the [Apache Incubator](#) has recommended, and the Apache Board of Directors has accepted, a resolution to create the Apache OpenJPA Top Level Project.

Apache OpenJPA is a project that implements Object Relational Mapping, and currently implements the standard JCP JSR-220 Java Persistence API (JPA). The latest release passes the JCP TCK for JSR-220 100%, meaning it is fully compliant with the standard.

Starting with a contribution by BEA of the mapping engine and JPA interface from the popular Kodo project, OpenJPA attracted support from a diverse set of contributors, committers, and users from independent individuals and companies, including several Apache projects. The project has learned how to govern itself and

has produced two releases while in incubation.

To assist in developing persistence applications OpenJPA works out-of-the-box with popular IDE's such as Eclipse and Netbeans. Additionally, plugin modules are available for the Apache Maven software project management and comprehension tool.

Many projects have adopted OpenJPA to provide the Object Relational Mapping for their needs, including Apache ActiveMQ, BEA Kodo, BEA WebLogic Server, Apache Camel, Apache Geronimo, Apache Ode, Apache OpenEJB, and IBM WebSphere Application Server. The community plans shortly to release version 1.0.0 of OpenJPA, reflecting the maturity and production quality of the code base.

Additionally, OpenJPA has been integrated with numerous other frameworks including Spring Framework, GlassFish, JOnAS Application Server, Sun Java System Application Server.

Apache OpenJPA -- Posted by [Tetsuya Kitahata](#) at [2007-06-24T10:47:58](#)

20 June 2007 - Apache Software Foundation established three new Top Level Projects

The Apache Software Foundation has established three new Top Level Projects (TLP) - Apache Quetzalcoatl, Apache Wicket, and Apache Commons.

- [Apache Quetzalcoatl](#): this springs mod_python and related bits out of the [Apache HTTP Server project](#) into its own TLP. Gregory Trubetskoy is the first Chair.
- [Apache Wicket](#): this is a light webapp framework for Java, graduating from the [Apache Incubator](#) into its own TLP. Martijn Dashorst is the first Chair.
- [Apache Commons](#): this is the venerable [Apache Jakarta Commons](#), now spun out into its own TLP, with Torsten Curdt as its Chair.

Note:

Apache Software Foundation -- Posted by [Tetsuya Kitahata](#) at [2007-06-20T22:18:09](#)

08 June 2007 - Apache POI TLP (Top Level Project) move

Apache POI has moved to a TLP at its new address, <http://poi.apache.org>.

Apache POI provides set of APIs for creating, reading, and writing files based upon the OLE 2 Compound Document Format using only Java.

Note:

Apache POI -- Posted by [Tetsuya Kitahata](#) at [2007-06-08T15:30:43](#)

07 June 2007 - Apache Turbine TLP (Top Level Project) move

Apache Turbine has moved to a TLP at its new address, <http://turbine.apache.org>.

Apache Turbine is a Java Servlet Web Application Framework and associated component library.

Note:

Apache Turbine -- Posted by [Tetsuya Kitahata](#) at [2007-06-07T15:28:45](#)

01 June 2007 - Apache OpenEJB Graduates from Apache Incubator to Become Top Level Project

[Apache OpenEJB](#) has graduated from the [Apache Incubator](#) and is now a top-level

project (TLP) at Apache.

Note:

Apache OpenEJB -- Posted by [Tetsuya Kitahata](#) at [2007-06-01T09:16:16](#)

18 May 2007 - Apache Felix has graduated into Top Level Project

[Apache Felix](#) has graduated from [Apache Incubator](#) to become a top level project at [the Apache Software Foundation](#).

Note:

Apache Felix -- Posted by [Tetsuya Kitahata](#) at [2007-05-18T03:38:19](#)

06 February 2007 - Apache ActiveMQ Graduates from the Incubator

[Apache ActiveMQ](#) has graduated from the Incubator to become a top level project (TLP) at [Apache](#). Many thanks to all those in the [Incubator](#) and ActiveMQ communities for making this happen

Apache ActiveMQ is a distributed messaging system which supports clients in Java (JMS), C++, Ruby, Python and other languages. Apache ActiveMQ is fast, provides many advanced features, and fully supports JMS 1.1 and J2EE 1.4. Apache ActiveMQ is released under the Apache License, Version 2.0.

For more information, please visit the new website at

<http://activemq.apache.org/>

[-- The Apache ActiveMQ Developers](#)

Note:

Apache ActiveMQ -- Posted by [Tetsuya Kitahata](#) at [2007-02-06T13:19:13](#)

01 February 2007 - Apache OFBiz is now officially a TLP (top level project) at the ASF

The Apache Open For Business Project, a.k.a. [Apache OFBiz](#), is now officially a TLP (top level project) at [the Apache Software Foundation](#) -- see [here](#) for more details on the incubation status.

Note:

Apache OFBiz -- Posted by [Tetsuya Kitahata](#) at [2007-02-01T10:42:32](#)

07 January 2007 - Apache Velocity moved up to Top Level

Apache Velocity is an Java templating engine. Apache Velocity has moved from [Jakarta](#) to a TLP (top level project -- with its PMC, project management committee) at its new address, <http://velocity.apache.org>.

Note:

Apache Velocity -- Posted by [Tetsuya Kitahata](#) at [2007-01-08T01:01:14](#)

29 October 2006 - Apache Harmony: Top-Level Project of the Apache Software Foundation

[Apache Harmony](#) is now a top-level project of [the Apache Software Foundation](#).

Note:

Apache Harmony -- Posted by [Tetsuya Kitahata](#) at [2006-10-29T08:18:12](#)

18 October 2006 - Apache HiveMind moved up to Top Level

Apache HiveMind (formerly known as Jakarta HiveMind under [the Apache Jakarta Project](#)) now has its own PMC (project management committee) and new project URL -- <http://hivemind.apache.org/>

Note:

Apache HiveMind -- Posted by [Tetsuya Kitahata](#) at [2006-10-18T18:35:28](#)

01 July 2006 - Apache XML-Security to become TLP as Apache Santuario

[The Apache XML-Security project](#) has voted to raise to a TLP named Apache Santuario and to broaden their scope to security software in general.

Berin Lautenbach, who had much contributed to the concept of [Apache XML Federation](#) framework, is the initial PMC Chair of new Apache Santuario Project.

Note:

Apache Santuario -- Posted by [Tetsuya Kitahata](#) at [2006-07-01T22:07:26](#)

28 June 2006 - Apache Shale to Become Top-Level ASF Project

On behalf of the [ASF \(Apache Software Foundation\)](#) Board and [Apache Struts](#) PMC, we are pleased to announce that [Apache Shale](#) has been accepted as a top-level project of the Apache Software Foundation.

As a top-level project, Shale will have its own website, mailing lists, repository space, and Project Management Committee. Shale will be an autonomous ASF project, rather than a subproject of Apache Struts.

The Shale framework for JavaServer Faces is nearing its first stable release. As a top-level project, it will be easier for Shale to attract new developers and expand its growing community.

The initial set of PMC members and committers for Shale is:

- Craig McClanahan
- James Mitchell
- Greg Reddin
- Sean Schofield
- Wendy Smoak
- Gary VanMatre
- Matthias Wessendorf

Apache Shale has strong ties to both the Struts and [MyFaces](#) projects. Most of the Shale PMC members are already involved in both projects, and plan on continuing to remain involved in them, along with Shale.

Apache Shale is a modern web application framework, intended for developers adopting JavaServer Faces as a core technology.

Shale began as a proposal for Struts 2.0, but instead became a subproject, so as to provide a JSF alternative for Struts developers. Recent developments for Struts Action 2 now make it easier for Struts developers to access JSF components from within an "action-based" application.

The initial Shale codebase was donated by Craig McClanahan, who also donated the original Struts codebase.

Note:

Apache Shale -- Posted by [Tetsuya Kitahata](#) at [2006-06-28T21:46:47](#)

21 June 2006 - Apache Tapestry moved up to Top Level

Apache Tapestry has moved to a TLP (Top Level Project) at its new address, <http://tapestry.apache.org>.

Apache Tapestry is an open-source framework for creating dynamic, robust, highly scalable web applications in Java. Tapestry complements and builds upon the standard Java Servlet API, and so it works in any servlet container or application server.

Note:

Apache Tapestry -- Posted by [Tetsuya Kitahata](#) at [2006-06-21T23:37:52](#)

16 June 2006 - Call for Papers Opens for ApacheCon Asia 2006

[The Apache Software Foundation \(ASF\)](#) is proud to announce that the first ever Asian edition of ApacheCon will be held in Colombo, Sri Lanka from August 15th to 17th, 2006.

This event creates a unique platform for the Open Source community to come together to gain deep insight into techniques and methodologies critical to the advancement of Open Source software, and gain skills to optimize the power and versatility of Apache software. The first ever Asian edition of this popular conference is specially designed to be accessible and affordable for the Asian developer community.

The conference brings together ASF members, developers and contributors, business people, and power users, across the world working with Apache and related software, to participate in a leading-edge forum to exchange ideas and network with peers.

The conference includes one day of intensive half-day tutorials, which will offer actionable techniques and methodologies pivotal to the increasing demand for Open Source software.

The main conference spans over two days offering a wide range of beginner, intermediate and advanced sessions in a two track format. The program consists of four world-renowned keynotes, sixteen technical sessions, panels and BOF sessions. In addition, there is a designated "hackthon" day allowing developers the opportunity to meet and hack on various Apache projects. Finally, a full day of tutorials, consisting of six half-day sessions gives attendees a chance to learn the

nitty gritty of various technologies from the experts themselves.

Come share your knowledge, hit upon new ideas, find solutions and connect with your peers at this educational, fun-filled gathering of users, developers, and vendors of Apache software.

The ASF and the conference organizer for the ApacheCon Asia conference, the Sri Lankan Free and Open Source Software Community, invite the Open Source community to submit session and tutorial proposals for ApacheCon Asia 2006.

The program committee is particularly interested in session and tutorial proposals on the following topics:

- Apache HTTP server topics (installation, configuration, migration, ...)
- All ASF projects such as Tomcat, Jakarta, mod_perl, XML, Web services, SpamAssassin and DB
- Scripting languages and dynamic content (such as Java, Perl, Python, Ruby, XML, XSL, and PHP)
- Security and e-commerce
- Performance tuning, load balancing and high availability
- Technical and non-technical case studies
- New technologies

Regular sessions will be 60 minutes long and tutorials will be 3 hours long.

Speaker benefits include:

- Travel costs will be covered up to \$350.00 for South and South East Asia and up to \$750.00 for other international travelers.
- Accommodation will be covered depending on the number of sessions
- Tutorial speakers will be paid an extra fee for their efforts based on enrollment
- Conference registration fees will be waived

To submit a proposal, visit <http://www.asia.apachecon.com/submit>. The deadline for submissions is July 9th, 2006.

Apache Conference -- Posted by [Tetsuya Kitahata](#) at [2006-06-16T15:40:18](#)

10 May 2006 - ApacheCon Europe 2006: The European Event for Apache Technologies

[The Apache Software Foundation](#) and Software & Support Media proudly announce the upcoming [ApacheCon Europe 2006](#) that will take place for the first time in the Irish capital Dublin from 26-30 June, 2006.

We kindly invite you to participate at ApacheCon Europe 2006 and get the latest information on all things Apache and meet an international crowd of Apache enthusiasts.

Registration is open! Save money by registering prior to May 29, 2006 at www.eu.apachecon.com.

ApacheCon Europe 2006 will offer seminars that cover the whole spectrum of Apache projects and technologies including the famous Apache HTTP Server, Jakarta, Tomcat, Geronimo, XML, Web Services, Portals, Cocoon, Lenya, Struts, and many more.

With more than 70 top-quality sessions and more than 20 tutorials ApacheCon Europe 2006 offers one of the biggest programs on Open Source technology this summer plus a keynote from Thawte and Ubuntu founder Mark Shuttleworth.

NEW: Open Source & Business Track

A new, business track has been added to ApacheCon Europe this year, which focuses on how to make money from your Open Source projects. This track will be especially appealing to management - CIOs, CTOs, project managers and others in the decision-making chain - who need to understand the considerations behind doing business with Open Source technologies. The Business Track at ApacheCon Europe 2006 offers two full days of sessions and tutorials that can be booked separately.

The complete agenda and registration information of ApacheCon Europe 2006 are available at <http://www.eu.apachecon.com>

We look forward to seeing you in Dublin!

Best Regards

[-- The ApacheCon Europe Team](#)

09 March 2005 - Apache MyFaces Moves Up To TOP LEVEL

According to the ASF Board Summary for February 23, 2005, MyFaces project has moved out of (graduated from) [the Apache Incubator Project](#) to its own top-level project: Apache MyFaces Project. MyFaces is an implementation of JSR-127. The Apache MyFaces Project has Manfred Geiler as its Vice President.

Note:

09 March 2005 - The Apache Directory Project Exits Incubator

[The Apache Directory team](#) proudly announces the [Apache Directory project](#) graduated [incubation](#) under [the Apache Software Foundation](#) (ASF) according to the ASF Board Summary for February 23, 2005.

Our primary vision is to build an enterprise directory server platform (Apache Directory Server) and its components where other Internet services snap in to store their data within the directory so they may be managed using LDAP. Those services include LDAP itself, DNS, DHCP, SLP, UDDI, NTP, and most importantly Kerberos, which can integrate with the services to provide full-featured network authentication service.

Features of Apache Directory Server:

- Designed as an LDAP and X.500 experimentation platform.
- The server exposes all aspects of administration via a special system backend.
- Both the backend subsystem and the frontend are separable and independently embeddable.
- Provides a server side JNDI LDAP provider which directly interacts with the backend storage.
- Powered by MINA, a powerful framework for building Internet protocol servers.

Coming soon:

- Remote management via JMX.

- Java-based triggers and stored procedures.

The Apache Directory team is looking for developers and users to work with the server and give feedback. Mailing list information is at:

<http://directory.apache.org/mailling-lists.html>

Check the Apache Directory project at: <http://directory.apache.org/>

The Apache Software Foundation provides organizational, legal, and financial support for a broad range of open source software projects. The Foundation provides an established framework for intellectual property and financial contributions that simultaneously limits contributors potential legal exposure. Through a collaborative and meritocratic development process, Apache projects deliver enterprise-grade, freely available software products that attract large communities of users.

[-- The Apache Directory Team](#)

05 March 2005 - ApacheCon Europe 2005: Call for Presenters deadline extended!

Call for Participation: ApacheCon Europe 2005 (CfP deadline extended!)

=====
18-22 July 2005, Stuttgart, Germany

NEW SUBMISSION DEADLINE: Saturday, 12 March 2005, 22:30 EDT

Come share your knowledge of Apache software at this educational and fun-filled gathering of Apache users, vendors, and friends.

[Apache Software Foundation](#) members are designing the technical program for [ApacheCon Europe 2005](#) that will include multiple tracks and dozens of technical sessions.

We are particularly interested in session proposals covering:

- [Apache web server](#) topics (installation, compilation, configuration, migration, ...)
- All [Apache Software Foundation](#) projects ([Jakarta](#), [mod_perl](#), [XML](#), [SpamAssassin](#), et

- cetera)
- scripting languages and dynamic content (Java, Perl, Python, TCL, XML, XSL, PHP, etc.)
 - Security and eCommerce
 - Performance tuning, load balancing, high availability
 - Technical and non-technical case studies
 - new technologies (web, Java, XML, anti-spam)

Only educational sessions related to projects of the Apache Software Foundation or the Web in general will be considered (commercial sales or marketing presentation won't be accepted; please contact info@ApacheCon.Com if you're interested in giving a vendor presentation).

Note:

Apache Conference -- Posted by [Tetsuya Kitahata](#) at [2005-03-04T23:48:16](#)

14 February 2005 - Jakarta Lucene Moves Up To Apache TOP-LEVEL

Lucene has migrated from the [Apache Jakarta project](#) to the top-level. Along with this migration, the source code repository has been converted to Subversion. The new site may be found at lucene.apache.org and other Lucene resources will be adjusting accordingly (mail-list etc).

Note:

Apache Lucene -- Posted by [Tetsuya Kitahata](#) at [2005-02-14T13:40:21](#)

10 February 2005 - ApacheCon Europe 2005 Call for Participation Is Open

The Call for Participation for [ApacheCon Europe 2005](#) is open!

ApacheCon will be returning to Europe for the first time since 2000, and this time we'll be in Stuttgart, Germany, from the 18th through the 22nd of July, 2005.

If you'd like to give a presentation, please go to the Web site (<http://ApacheCon.Com/2005/EU/>) and submit a proposal. Or more than one! *The deadline is 4 March 2005.*

Please feel free to forward this message far and wide.

[ApacheCon Europe 2005](#) will be held in Stuttgart, Germany on 18-22 July 2005.

Offering a wide range of beginner, intermediate and advanced sessions, ApacheCon attendees learn firsthand the latest developments in [Apache](#), the world's most popular Web server software, as well as key open source projects spanning [PHP](#), [Perl](#), XML, Java, [SpamAssassin](#), WebDAV, and much more.

Apache Conference -- Posted by [Tetsuya Kitahata](#) at [2005-02-10T16:23:11](#)

15 December 2004 - Contributing to the Apache Software Foundation

Greetings, members of the [Apache](#) community.

As the end of the year approaches, we would like to remind you that you don't have to write code or documentation to contribute to [the Apache Software Foundation](#).

This is the time of year that many people look to donate money to charity not only out of the goodness of their heart, but for the purposes of tax deductions, which makes Tax Day just that much nicer in the United States.

[The Apache Software Foundation](#) is a registered 501(c)(3) non-profit, and if you pay taxes in the United States, any money that you contribute is tax deductible.

You can contribute via PayPal:

<http://www.apache.org/foundation/contributing.html#Paypal>

Or by check:

<http://www.apache.org/foundation/contributing.html#SnailMail>

For all the details, please see the contributing page, located here:

<http://www.apache.org/foundation/contributing.html>

Many companies have "Matching Gift Programs" that will double or triple your tax-deductible contributions. Check with your personnel office to find out if your company offers this--they should be able to provide you with a form that you can fill out and send in with your contribution. If your employer wishes to donate to the ASF, please have them contact us at fundraising@apache.org

Please email fundraising@apache.org if you have any questions or comments.

-- The Apache Software Foundation Fundraisers

Apache Software Foundation -- Posted by [Tetsuya Kitahata](#) at [2004-12-15T06:45:08](#)

29 November 2004 - Apache Avalon Closed

[The Apache Software Foundation](#) Board passed the following resolution closing [Avalon](#) during the 2004 [ApacheCon](#):

WHEREAS, the Board of Directors deems it no longer in the best interest of the Foundation to continue the Apache Avalon project due to the separation of the community into new projects

WHEREAS, the Avalon PMC is unable to further fulfill the responsibilities of creation, maintenance, and support of the Avalon software

NOW, THEREFORE, BE IT RESOLVED, that the Apache Avalon Project is hereby terminated; and be it further

RESOLVED, that the Excalibur PMC be and hereby is tasked with maintenance of the Avalon framework software; and be it further

RESOLVED, that the Apache Avalon PMC be and hereby is no longer responsible for the creation and maintenance of software related to component and service management, based on software licensed to the Foundation; and be it further

RESOLVED, that the office of "Vice President, Apache Avalon" is hereby terminated; and be it further

RESOLVED, that the Apache Avalon PMC is hereby terminated.

What does this mean?

[Avalon](#) is now officially closed. We will be working with the Apache Infrastructure team to close all Avalon resources over the next few days. The mailing lists archives will remain available; the SVN and CVS repositories will become read only; the currently distributed software will remain available via distribution mirrors; the site will be reconstructed to present a "closure" message and appropriate redirects.

Example closure message:

<http://avalon.apache.org/closed.html>

Where will I get support/code/updates for Avalon?

As previously announced, Avalon Framework, LogKit, and Cornerstone have been moved to Apache Excalibur (<http://excalibur.apache.org>) along with the original ECM and Fortress code. The Excalibur team includes many experienced Avalon developers and support questions should be directed there.

Forks of Phoenix and Merlin have started at Codehaus Loom and DPML Metro respectively. Users of those software packages are encouraged to investigate these projects.

I strongly urge all subscribers of these Avalon mailing lists to subscribe to the mailing lists of one or more of the projects mentioned above:

Excalibur Mailing Lists:

<http://excalibur.apache.org/mail-lists.html>

DPML Mailing Lists:

<http://www.dpml.net/central/about/resources/lists.html>

Codehaus Loom Mailing Lists:

<http://loom.codehaus.org/Mailing+lists>

For more information about the Avalon closure, please review [the October 24 announcement](#):

<http://www.mail-archive.com/users%40avalon.apache.org/msg05033.html>

On a personal note, I want to thank all the developers and users who have made this experiment and community happen. I look forward to working with many of you in the new projects forming from Avalon. Thank you.

J Aaron Farr
Apache Avalon PMC Chair

17 November 2004 - Apache XML Graphics Project Launched

[Apache XML Graphics Project](#) Launched and New Website Has Been Created. This is one of the major steps of [the Apache XML Project](#) to promote its projects upwards and become a [federation](#), or a central information repository, of all the XML-related projects at the ASF.

Apache XML Graphics Project is responsible for software licensed to the Apache Software Foundation intended for the creation & maintenance of:

- the conversion of XML formats to graphical output
- related software components

Apache XML Graphics Project currently consists of the following sub-projects, each focused on a different aspect of XML Graphics:

- [Apache Batik](#) - A toolkit for Scalable Vector Graphics (SVG), based in Java
- [Apache FOP](#) - A print formatter & renderer for XSL-FO (FO=formatting objects), based in Java

Jeremias Maerki is the first Chair of the Apache XML Graphics PMC (Project Management Committee).

Note:

Apache XML Graphics -- Posted by [Tetsuya Kitahata](#) at 2004-11-17T23:07:13

25 October 2004 - Apache Xalan Project Becomes Top Level in Apache.Org

The Board of [the Apache Software Foundation](#) approved the creation of Apache Xalan PMC (Project Management Committee), with Brian Minchau as its Chair. It picks up the Xalan projects from [Apache XML](#).

This is a part of an effort of the Apache XML Project to reduce the number of disperate projects under its covers, with the hope that the smaller projects can provide more fine-tuned oversight and management of the codebases and communities, and is one of the major steps of [the Apache XML Project](#) to promote its projects upwards and become a [federation](#), or a central information repository, of all the XML-related projects at [the Apache Software Foundation](#).

27 June 2004 - Henri Yandell Succeeds Geir Magnusson Jr. As Apache Jakarta Chair

Henri Yandell has been elected as the next Jakarta Chair succeeding Geir Magnusson Jr. Here's Henri eulogy for Geir: By the way, in case it's Monday morning and everything is a haze, I should mention that the board have accepted the PMC's recommendation of myself as PMC chair to replace Geir. While Geir is an example of a developer who is synonymous with Jakarta, he's now taking on the highly public role of Geronimo PMC chair which should dovetail with his role as Apache's JCP representative quite nicely. I'm sure we're all very appreciative of his chairship over the last 6 months, and I'm looking forward to trying to live up to his and Sam's example....

Note:

Apache Jakarta -- Posted by [Tetsuya Kitahata](#) at [2004-06-27T13:42:53](#)

25 June 2004 - Full-fledged Apache XMLBeans moves up to Top Level

[Apache XMLBeans Project](#) has graduated out the [Apache Incubator Project](#) to become Top Level Project in the [Apache Software Foundation](#). Apache XMLBeans provides a simplified model for interacting with [XML](#) documents. The project originated with a contribution from [BEA Inc.](#), however, after its time within the [Apache Incubator](#), it is now a full-fledged Apache community and codebase under Apache License 2.0. Cliff Schmidt is the Chair of the new [Apache XMLBeans](#) PMC (Project Management Committee).

Note:

This is one of the steps of the [Apache XML Project](#) to promote its projects upwards and become a [federation](#), or a central information repository, of all the XML-related projects at the ASF. Look for more promotions over the next few months.

Note:

Apache Software Foundation -- Posted by [Tetsuya Kitahata](#) at [2004-06-25T03:48:17](#)

24 June 2004 - Full-fledged Apache SpamAssassin moves up to Top Level

The resolution below was brought before the Board of the [Apache Software Foundation](#), and has passed. [SpamAssassin](#) has graduated from the [Apache Incubator Project](#) to become a full-fledged top level project in the [Apache Software Foundation](#). Daniel Quinlan will be the PMC Chair of the Apache SpamAssassin.

This was finally made possible now that Network Associates officially transferred ownership of the SpamAssassin trademarks to the Apache Software Foundation. The Apache Software Foundation is now the proud owner of the fantastic SpamAssassin brand and the codebase. The SpamAssassin team is on the verge of releasing a long overdue 3.0 release.

24 June 2004 - Call for Participation for ApacheCon US 2004

[Call for Participation: ApacheCon US 2004](#)

=====

November 14-17, 2004, Las Vegas, Nevada, US

SUBMISSION DEADLINE: Friday, 23 July 2004, 23:59 EDT

*** NOTICE THE TIME: MIDNIGHT FRIDAY NIGHT, U.S. EASTERN TIME! ***

Come share your knowledge of Apache software at this educational and fun-filled gathering of Apache users, vendors, and friends.

[Apache Software Foundation](#) members are designing the technical program for ApacheCon US 2004 that will include over 40 sessions planned.

We are particularly interested in session proposals covering:

- [Apache Web server](#) topics (installation, compilation, configuration, migration, ...)
- All Apache Software Foundation projects ([Jakarta](#), [mod_perl](#), [Xerces](#), et cetera)

- scripting languages and dynamic content ([Java](#), [PHP](#), [Perl](#), [TCL](#), [Python](#), [XML](#), XSL, etc.)
- Security and eCommerce
- Performance tuning, load balancing, high availability
- tips for writing Apache Web server modules
- Technical and non-technical case studies
- new Web-related technologies

Only educational sessions related to projects of the Apache Software Foundation or the Web in general will be considered (commercial sales or marketing presentation won't be accepted; please contact info@ApacheCon.Com if you're interested in giving a vendor presentation).

If you would like to be a speaker at the ApacheCon US 2004 event, please go to the [ApacheCon Web site](#), log in, and choose the 'Submit a CFP' option from the list there:

<http://ApacheCon.Com/html/login.html>

NOTE: If you were a speaker or delegate at a past ApacheCon, please log in using the email address you used before; this will remember your information and pre-load the CFP form for you. If this is your first time being involved with ApacheCon, please create a new account.

ALL SESSIONS WILL BE 50 MINUTES LONG! If you wish to propose a session that will take two consecutive slots, please mention that in the comments section of the CFP form.

USE THE SAME FORM to submit a proposal for a half- or full-day tutorial.

EXPENSES AND FEES are expected to be covered at approximately the same rate as for ApacheCon 2003 US; watch the [ApacheCon site](#) and the announce@ApacheCon.Com and discuss@ApacheCon.Com mailing lists for news about the final details.

01 June 2004 - The ASF announces Apache Geronimo as an Official Project

The Geronimo project is now out of Apache Incubator and has been granted top-level project status by the ASF. The objective of the Apache Geronimo project is to produce an open source, certified implementation of the Java 2 Platform, Enterprise Edition (J2EE) specification licensed under the Apache License and offered to the public at no charge. Since its inception in August 2003, the Geronimo project has been working under the oversight of the Apache Incubator, a process used by the ASF to ensure new projects build a healthy community. The process also provides oversight and inspection of the codebase to ensure that it conforms to the Foundation's high standards for licensing and code integrity. The board of the apache software foundation approved the graduation of the Apache Geronimo project from within the Incubator to its own "top level" project. Geir Magnusson will be the new Chair of Apache Geronimo. 11 May 2004 - Press Release: Apache HTTP Server Technical Leadership

Press Release: Apache HTTP Server Technical Leadership Congratulations and kudos to the HTTP Server Project team for their hard work and accomplishments. To commemorate, the ASF issued this press release today: ----- Apache HTTP Server Reaches Record Eight Consecutive Years of Technical Leadership. San Francisco, CA (May 11, 2004) The Apache Software Foundation today announced that its HTTP Server platform has reached a milestone of eight consecutive years of World Wide Web technology leadership. Since its first release in April of 1995, the Apache HTTP Server has become as pervasive as the Web itself. According to two separate and independent surveys, the Apache HTTP Server, which originally established itself as the leading web server technology in April 1996, continues to acquire even greater market, growing faster than all other competing web server technologies. We started the Apache project to provide the development community with a secure, efficient and extensible open source Web server platform. Our goal from the very beginning was to establish the Apache HTTP Server as the dialtone of the web a standards-compliant, commercial grade reference platform. Through collaboration with the community, we have continually improved upon and added modules to the core Apache HTTP Server platform, thereby evolving the quality and breadth of the technology, said Jim Jagielski, Executive Vice President and Secretary of the Apache Software Foundation. Our recent achievement is testament to the benefits of

the process of open source software development itself. By collaborating with the community, we have been able to consistently deliver freely accessible, robust, feature-rich Web server technology. Apache HTTP Server Leadership Continues to Grow In an April 2004 Security Space survey of 14,174,836 Web sites, the Apache HTTP Server was recognized as the most widely implemented Web server platform, with 70.48% share, representing 9,990,804 deployed servers. In an April 2004...
